

Day 1

①

5-2-05

Intro ✓ 5th Part of QDPA ✓

Read Chart

Andre had twelve comic books.

Ten of them were about soccer.

How many were about motorcycles?

Q. How many books about

Motorcycles does Andre have?

D. 10 and 12 (Where did we
get the 10 + where did
we get the 12?)

P. Where did we get the P?
Problem It could be - or
Our Plan

$$12 - 10 = 2$$

A. What's the A? The answer
It's 2

Today we're going to add another
letter X. The X means check
We're going to check our
answer and see if it
makes sense.

Let's look at our answer 2 & see if
it makes sense. Let's read the problem
thru and see if it makes sense.

unfin

Does it make sense?

Let's use the beans and see if it makes sense. Oh, it checks out. My computer only makes an X instead of a ←

Paper #1 Whole Group

Varun - Mrs L.I think I know the data!

Cicra found 8 snails.

Vicente found 4 snails.

How many snails do they have in all? —

Q

D

A

X

* on top of #1

Paper #2 On your own quietly at the table

Rachel found 7 snails

Lucas found 5 more snails the next day.

How many snails did they find in all?

ans available

Q

unfin

Paper # 3A/3B Go to another table - on own

_____ found _____ snails.

_____ found _____ more snails.

How many snails do they have in all? _____

Q

D

P

A

X

_____ found _____ snails.

_____ found _____ snails.

How many snails do they have in all? _____

Children
have to write
own QDPAX

Varun - How do you know your problem
is right? 25 50 75 100

unfin

Paper #1 All back at table
Jane found 6 snails.

I model Madeline found 3 more
snails than Jane.
How many snails do they
have in all?

- O
- D
- P
- A
- X

If we
use the
beans

What could our problem be?

$$6 + 3 = 9$$

I'm going to check that w beans
o o o o o o Jane's 6 snails

How many does Madeline have?

3 - No 3 more than Jane

o o o o o o (o o)

How many do they have in all?

15

unfin

$$9 + 6 = 15$$

How are we going to rewrite our problem?

$$6 + 3 = 9$$

2-part problem

What does this go with?

1st we had to find out how many snails Madeline had

Then $9 + 6 = 15$ how many Jane and Madeline had

We ran out of time for kids to do any writing on their own.
